Subject: Company newsDate: January, 2011.

BTG celebrates 90 years of innovation

In 2011, we celebrate the 90th anniversary of the birth of the company that has become a global leader in transforming innovative technology, people and application expertise into financial gains for our clients.

Founded in Säffle, Sweden by Dr. Torsten Källe, a pioneer in papermaking process control with over 50 patents to his name, the young company quickly built a reputation for technical prowess and reliable application expertise. Over the years, always placing the customer at the center of our activities has kept us at the forefront of our industry.

Today, we are not only proud of our long history, but are evermore committed to applied technology that helps our clients improve their operating performance and bottom line.

BTG – raising your productivity
